

## Assessment methods, criteria and regime

Progress and learning is assessed not only at the end but throughout the entire course. Evidence of an ability to think through and critically analyse challenges will be highly rewarded in the assessment.

Students' grades will be determined by individual **Assignments**, based on description of the key idea, normative regulation and steps necessary to build innovation pipeline and supply it with ground-breaking ideas.

- The relative weight of **Assignment Brief** will be set at 100%. It will be marked on the basis of: The aim of the report clearly formulated 20%; Coherence of the arguments and reflection 10%; Reflection based entirely on the description of facts and events 40%; Utilisation of adequate terminology to describe the project management 20%; Evidence of activities undertaken
